

SafetyLink CableLink™

Rafter-Mounted Anchor

PRODUCT CODE: CABLK001 CableLink Complete Unit

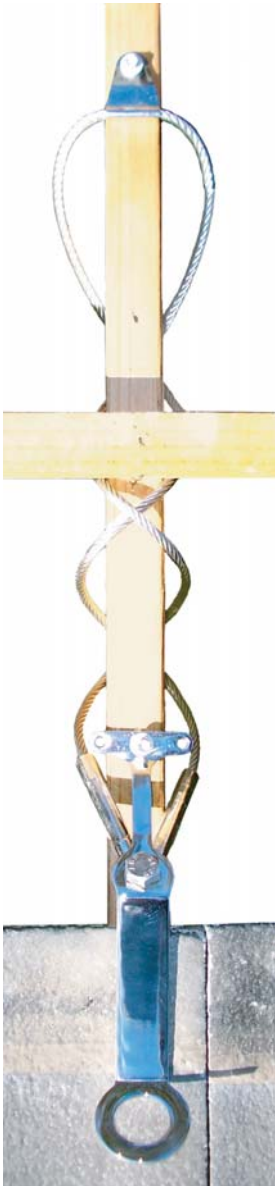

Quick to install, with amazing performance ability SafetyLink's patented CableLink™ is the perfect anchor for tile and slate roofs.

It combines energy absorbing capabilities with a design that is practically invisible when looking at the roof.

Unlike traditional anchors that place a leveraged force onto the rafter attempting to break it. The CableLink™ hugs the rafter using the cables stretching capabilities to minimize the impact along the rafter.

The CableLink™ is designed to slowly transfer the force away from the point of impact along the length of the rafter. It dissipates energy as it tightens around the rafter resulting in less force on the structure and the person attached to the anchor.

The CableLink™ is tested and manufactured in accordance with the applicable Australian and New Zealand Standards AS/NZS 1891.4 and is rated as a two person anchor.
